DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 4 –13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 has two periods in the last line. It is unclear which of the two sentences so defined is the claimed invention. Claim 1 and its dependents are therefore rendered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 4-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al (US 3,565,678 02-1971). Johnson discloses (Column 5, lines 41-60)

the reaction of the methyl esters of corn oil (containing, for example, the C₁₈ linoleic acid) with methoxypolyethylene glycol having a molecular weight of 550 in the presence of sodium methylate at 135⁰C with removal of methanol under vacuum to give the corresponding esters. Johnson discloses (Column 6, lines 28-37) that the ester may be a saturated compound as well. Johnson therefore anticipates claims 1 and 4-24

4. Claims 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Cox et al (Journal of the American Oil Chemists Society, Methyl Ester Ethoxylates, 1997, 74 (7), pages 847-859). Cox discloses (Page 852, Table 3) methyl ester alkoxylates corresponding to those instantly claimed. The Examiner notes that compounds are defined by their atoms and bonds and not their method of manufacture. Cox et al therefore anticipates claims 21-24.
5. Claims 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Pi Subarana et al (US 6,008,391 12-1999). Subarana discloses (Column 3 line 61 – column 4, line 30, including Table 1) a process for the alkoxylation of C_{12/16} cocofatty acid methyl ester to give methyl ester alkoxylates corresponding to those instantly claimed. The Examiner notes that compounds are defined by their atoms and bonds and not their method of manufacture. Subarana et al therefore anticipates claims 21-24.

Conclusion

6. Claims 1 and 4-24 are pending. Claims 1 and 4-24 are rejected.
